Project description

Limoo, a team communication platform tailored for the Iranian market, offers features such as chat, online meetings, file sharing, and tool integration via bots. Having successfully launched its MVP and attracted over 1,800 active users, Limoo is now aiming for expansion and is seeking new investors. To enhance its market appeal and usability, the company plans to refine its landing page design, aiming for a more delightful look that attracts both users and potential investors.

Goals

1. Increase the conversion rate of visitors to registered users.
2. Boost the number of demo requests.
3. Implement an aesthetic and persuasive design to engage more users.
4. Improve the conversion rate by clearly introducing our platform within the first 2 minutes.
5. Revise the brand image and tone of voice.
6. Ensure the design is feasible and easy to develop.

B

1

- Conduct a brief meeting.
- Perform competitive research.
- Execute user testing.
- Undertake a UX evaluation.

2

- Designing Information Architecture
- Creating Low-Fidelity Wireframes

3

- High-Fidelity Wireframes
- Crafting a UI Kit and Brand Identity

4

- Designing the UI
- Creating Documentation and Standardizing Handoff Procedures

5

- Conducting Usability Tests and Gathering User Feedback
- Stakeholder Feedback Sessions
- Resolving Issues
- Handing Over the Project

Key Insights

From Brief Meeting To Competitive Analysis, Data Analysis, User Test And UX Evaluation

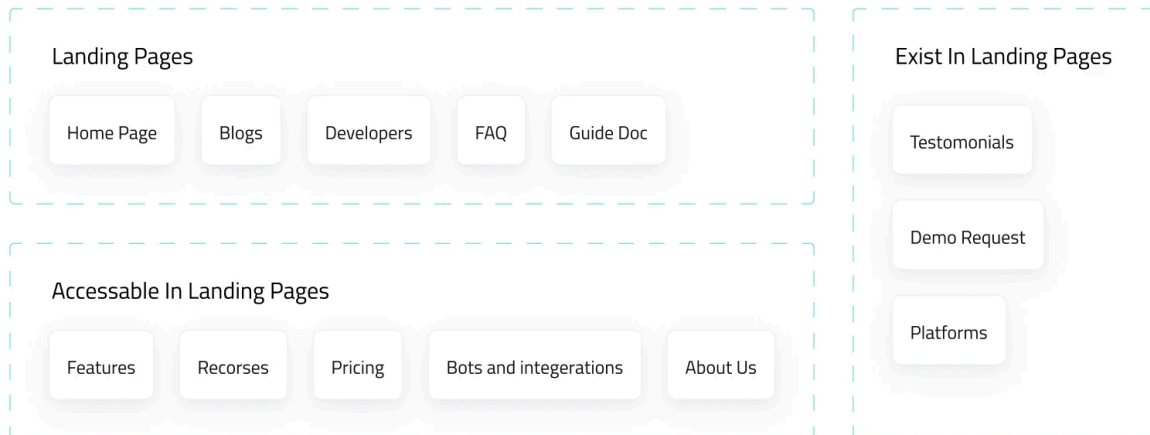

1. Our paid users include companies, corporations, and organizations.
2. After analyzing Limoo's customer data, we identified that Limoo's target audience falls into six industries:
 - Software teams & companies
 - Holdings & large corporations
 - Startup studios and accelerators
 - Content creators & news agencies
 - Electronic commerce
 - Educational centers
3. The lack of proper information architecture has led to users being unable to find what they were looking for, resulting in a high bounce rate.
4. Given the high proportion of desktop users (over 70%), adopting a desktop-first design approach is advisable.
5. The concept of an online team communication platform is not widely accepted in the Iranian market, especially among educational centers.
6. We need to reconsider the demo request flow due to the low interaction rate on the current website.
7. Our analysis indicates that over 80% of purchases occur after a demo session.
8. Current users have stated, "Limoo is the best replacement for our team instead of personal messengers, because it offers a single solution for all the features we need."

B

- Achieve a cohesive visual language across the dashboard and application.
- Craft a design guideline specifying the use of color, typography, and brand identity.
- Choose an illustration kit that aligns closely with our visual language and fills our visual gaps.
- Design sections that are usable and clear, effectively conveying our message.
- The deadline was tight; we had only two weeks to complete the entire process.
- Explain Limoo's usage for different personas across 6 mentioned industries.

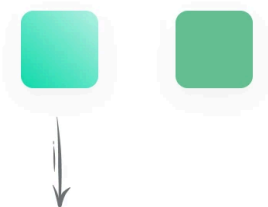

Information architecture

B

OLD COLORS

A fraction of the primary color is used in typography, buttons, and certain texts.

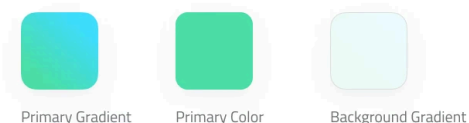

- Both white and black texts lack sufficient contrast on it. (2.21 : 1)
- It is not as catchy as we expect

primary color which is used in logo.

Enhancing sharpness would improve the utility.

NEW COLORS

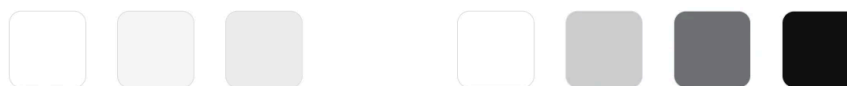

Primary Gradient

Primary Color

Background Gradient

Let's do it with 6 shades

Background Colors

Text Colors

Cards paddings

	📱	🖥️
Small Card	16	24
Medium Card	24	40
Large Card	24	64

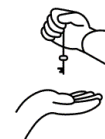

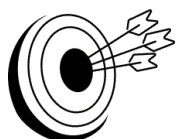

Border radios

	📱	🖥️
Buttons	8	8
Promote Cards	48	72
Cards	16	24
Small Cards	16	16

Spacing

	📱	🖥️
Between Sections	40	80
Between Cards	16	24
Menu	40	80

Illustrations

B

An short explanation on hero section

1.

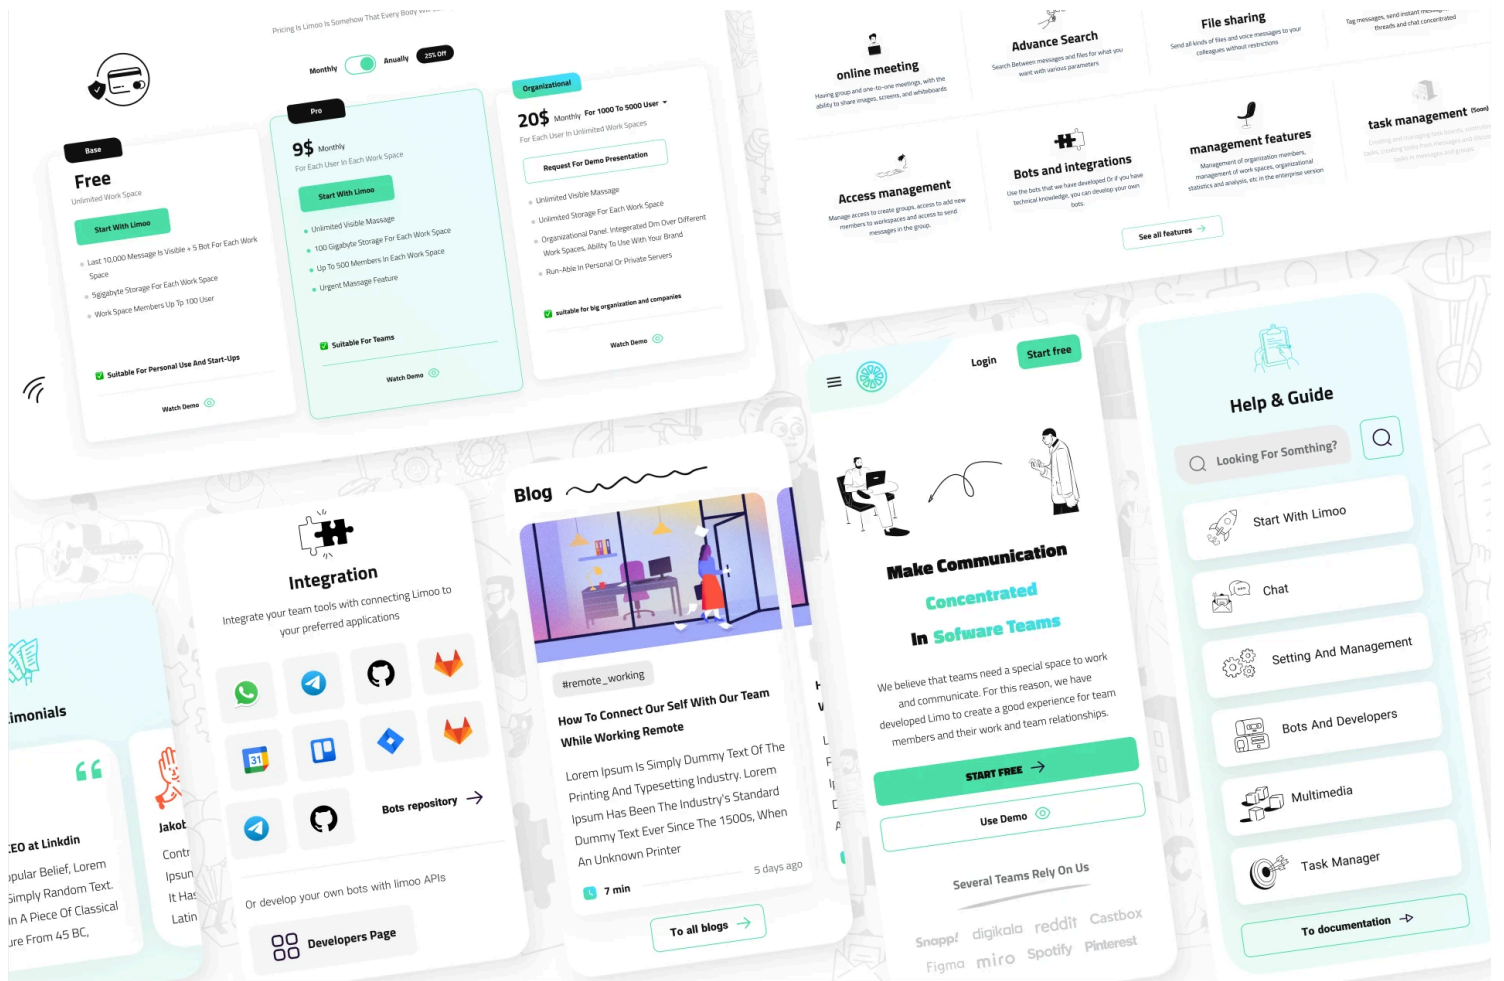

An Answer To "How Limoo Can Help Different Users And Usages?" (check prototype down blow to see animation)

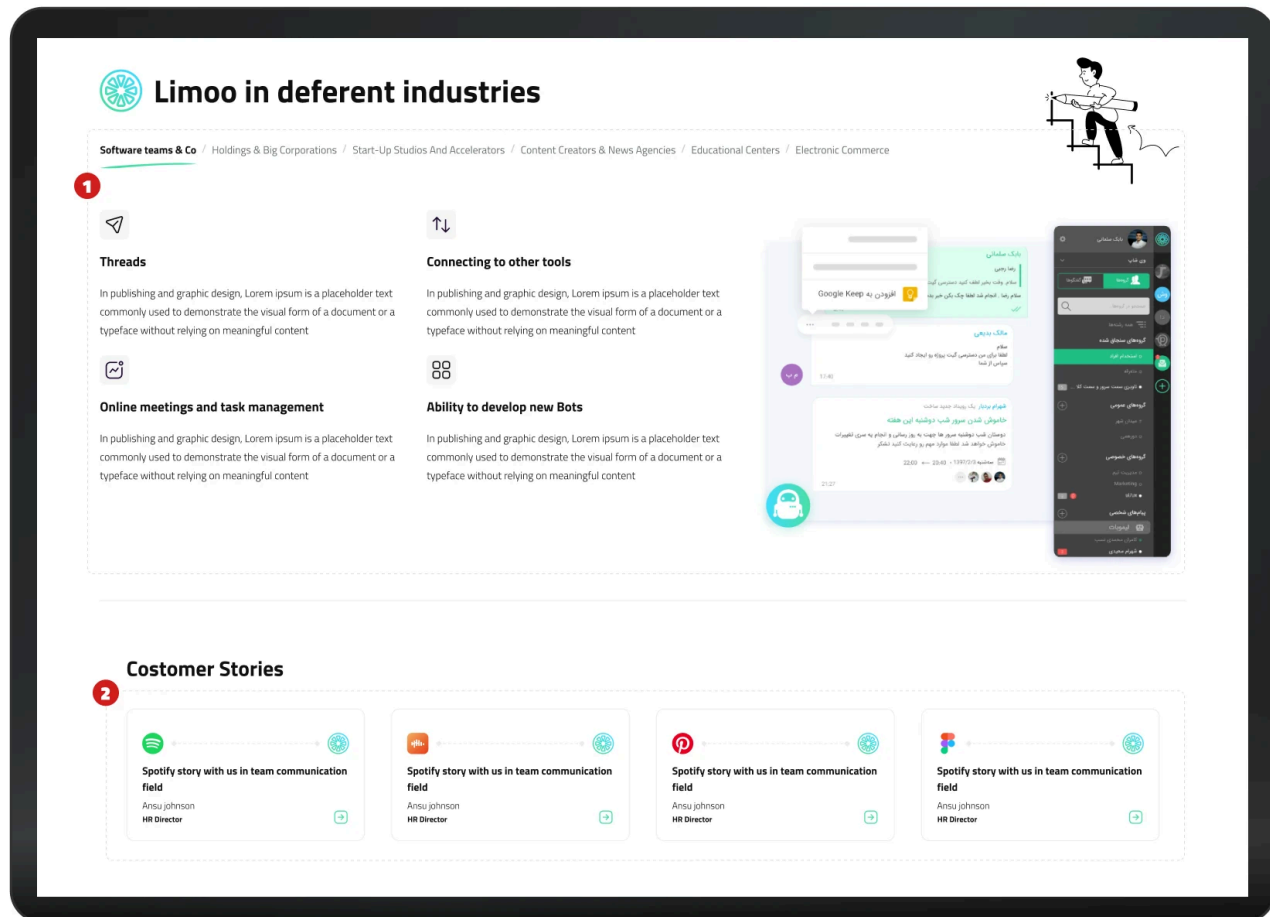

2.

Primary Button: Register And Start Using
Secondary Button: A Flow That Let User Get Familiar With Limoo

3.

With Bringing Up This Section, We Show Limoo Is Trustworthy.

Time To Enjoy The Prototype!

Due To Translation From Persian To English, Maybe Some Time The Text Does Not Make Sense
